## TOP SECTORS

## THE FUND AT A GLANCE

Index investing has become one of the most popular investment styles in the United States. We feel that in efficient markets, the lower relative fees give our index funds a distinct advantage over actively managed funds with similar investment styles. Furthermore, investing in an index fund gives the investor diversification and a predictable management style.

- The stocks in the Fund represent roughly 8% of the total market index as measured by the S&P 1500.
- It is made up of medium-sized companies, many of which are leaders in their respective industries.
- The diverse portfolio invests in each major market sector, giving the investor diversification across U.S. stocks.
- The stocks held by the Fund are different than those included in the S&P 500 and S&P SmallCap Index Funds. Therefore, it represents a diversification opportunity for investors of our other index funds.

This letter must be preceded or accompanied by the current prospectus for the Funds comprising of the California Investment Trust Fund Group. Investors should carefully consider a fund's investment objectives, risks, charges and expenses before investing. Please carefully read the prospectus before investing. Fund information is not intended to represent future portfolio composition. Portfolio holdings are subject to change and should not be considered a recommendation to buy individual securities. Total returns include changes in share price and the reinvestment of income dividends and all capital gain distributions. All performance figures reflect a partial waiver of fees where applicable. Without the partial waiver of fees, the performance figures would be lower. RFS Partners is the distributor of the California Investment Trust Fund Group, 10/11.
