S&P 500 Index Fund

Ticker Symbol: SPXKX

GOAL

Attempt to replicate the total return of the U.S. stock market as measured by the S&P 500 Composite Stock Price Index.

The S&P 500 Index Fund is a diversified mutual fund that seeks to provide investment results that correspond to the total return of common stocks publicly traded in the United States, as represented by the Standard & Poor's 500 Composite Stock Price Index.

PRINCIPAL STRATEGY

The S&P 500 Index includes the common stocks of 500 leading U.S. companies from a broad range of industries. Standard & Poor's, the company that maintains the index, makes all determinations regarding the inclusion of stocks in the index. Each stock is weighted in proportion to its total market value.

The Fund is passively managed. It invests primarily in the stocks that make up the index so that the weighting of each stock in the portfolio approximates the index. The Manager's goal is to maintain a return correlation of at least .95 to the S&P 500 Index (a return correlation of 1.0 is perfect). Under normal market conditions, it is the Fund's policy to invest at least 80% of its total assets in the underlying stocks of the index. As a rule of thumb, the percentage will generally be higher.

Like many index funds, the Fund may invest in futures contracts and lend securities to minimize the performance variation between the Fund and the index. This performance gap occurs because, unlike the index, the Fund must pay operating expenses and contend with the flow of cash in and out of the portfolio. While we expect the Fund's performance to closely represent the index, the Fund will generally underperform the index.

PRINCIPAL RISKS

The stock market goes up and down every day. As with any investment whose performance is linked to these markets, the value of an investment in the Fund will change.

SECTOR BREAKDOWNS

as of November 30, 2009

Industry	% of Fund
Consumer, Non-Cyclical	23.2%
Financial	13.6%
Technology	13.1%
Energy	12.3%
Communications	11.4%
Industrial	10.7%
Consumer, Cyclical	8.8%
Utilities	3.5%
Basic Materials	3.4%

Large Cap Stocks

The stocks that are represented in the S&P 500 Index make-up about 88.6% of the total market index, as measured by the S&P 1500 Index. For many investors, the S&P 500 Index functions as the benchmark for the entire stock market. As of November 30, 2009, the individual stocks that make up the index have market values ranging in size from \$720 million to \$356.4 billion. The median market value is \$8.4 billion.

The index is made up of stocks from many diverse industries. The industry table above gives you a general idea of the exposure to specific sectors.

During a declining stock market, an investment in this Fund would lose money.

The Fund is primarily invested in the U.S. stock market and is designed to passively track the performance of the large cap sector. In an attempt to accurately track the performance of the S&P 500 Index, the Fund does not intend to take steps to reduce its market exposure in any market.

Many factors will affect the performance of the stock market. Two major factors are economic and political events. The impact of positive or negative events could be short-term (by causing a change in the market that is corrected in a year or less) or long-term (by causing a change in the market that may last for many years). Events may affect one sector of the economy or a single stock, but may not have a significant impact on the overall market.

The Fund invests in large companies from many sectors. In doing so, the Fund is not as sensitive to the movements of a single company's stock or a single economic sector. However, during periods where investment alternatives such as mid cap stocks, small cap stocks, bonds and money market instruments outperform large cap stocks, we expect the performance of the Fund to underperform other mutual funds that invest in these alternatives.

The S&P 500 Index is a capitalization weighted index, meaning companies are weighted based on their size. Thus, poor performance of the largest companies could result in negative performance of the index and the Fund.

Although the Fund's primary risks are associated with changes in the stock market, there are other risks associated with the Fund. These risks generally apply to how well the Fund tracks the index. For example, the Fund invests in futures contracts to the extent that it holds cash in the portfolio. If these futures contracts do not track the index, the Fund's performance relative to the index will change.

Some mutual funds lend portfolio securities in order to offset expenses. The Fund has never engaged in this strategy, however, in the event that it did, there is a risk that the practice could negatively impact the share price of the Fund.

OTHER RISKS OF THE FUND

Under normal circumstances the Fund may follow a number of investment policies to achieve its objective. The Fund may invest in stock futures. Losses involving futures can sometimes be substantial, in part because a relatively small price movement in a futures contract may result in an immediate and substantial loss for the Fund. In an effort to minimize this risk, the Fund will not use futures for speculative purposes or as leverage. It is the Fund's policy to hold cash deposits equal or greater than the total market value of any futures position. The value of all futures and options contracts in which the Fund acquires an interest will not exceed 20% of current total assets.

IS IT RIGHT FOR YOU?

If you are looking for a diversified stock fund, this Fund may be right for you. You should be comfortable with the volatility of the stock market and the risk that your investment could decline in value.

PERFORMANCE

The following chart and table show the variability of the Fund's performance from year to year. The table compares the performance of the Fund with a benchmark index. These figures assume that all distributions are reinvested. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts. It is important to remember that past performance does not accurately predict future performance.

Best Quarter: 15.52% (Q2, 2009)

Worst Quarter: -21.68% (Q4, 2008)

Year to date performance as of 11/30/09: 23.29%

Date of inception: 10/16/03

Average Annual Returns As Of 12/31/08

	<u>1 year</u>	<u>5 years</u>	<u>Since Inception</u>
<u>S&P 500 Index Fund</u>			
Return Before Taxes	(36.78)%	(2.74)%	(1.51)%
Return After Taxes on Distributions	(37.15)%	(3.14)%	(1.89)%

Fund Fees & Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees

Sales and redemption charges **none**

Annual Operating Expenses

(expenses that are deducted from Fund assets)

Management Fees 0.25%

Distribution (12b-1) Fees 0.25%

Other Expenses 0.59%

Total Annual Operating Expenses 1.09%

Expense Reimbursement* (0.23)%

Net Annual Fund Operating Expense** **0.86%**

Annual account fee \$10.00

Example of Expenses

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 year	3 years	5 years	10 years
\$ 98	\$ 353	\$ 627	\$1,402

“Standard & Poor’s”, “S&P”, “S&P 500”, “Standard & Poor’s 500” and “500” are trade marks of McGraw-Hill Cos., Inc. and have been licensed for use by the Fund. The Fund is not sponsored, endorsed, sold or promoted by S&P and S&P makes no representation regarding the advisability of investing in the Fund.

* The Manager may be reimbursed for any foregone advisory fees or unreimbursed expenses within three fiscal years following a particular reduction or expense, but only to the extent the reimbursement does not cause the Fund to exceed any applicable expense limit and the effect of the reimbursement is measured after all ordinary operating expenses are calculated. Any such reimbursement is subject to the Board of Trustees' review and approval.

** The Manager has agreed to further limit the Fund's expenses at 0.86%. This limitation is guaranteed through 12/31/10.

FINANCIAL HIGHLIGHTS

The financial highlights table is intended to help you understand the Fund's performance for the past five fiscal years. Certain information reflects financial results of a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been audited by Tait, Weller & Baker LLP, whose report, along with the Fund's financial statements, are included in the Annual Report, which is available upon request.

S&P MidCap Index Fund

Ticker Symbol: MIDKX

GOAL

Attempt to replicate the performance of medium-sized U.S. companies as measured by the S&P MidCap 400 Index.

The S&P MidCap Index Fund is a diversified mutual fund that seeks to provide investment results that correspond to the total return of publicly traded common stocks of medium-size domestic companies, as represented by the S&P MidCap 400 Index.

PRINCIPAL STRATEGY

The S&P MidCap Index includes the common stocks of 400 medium-sized U.S. companies from a broad range of industries. Standard & Poor's, the company that maintains the index, makes all determinations regarding the inclusion of stocks in the index. Each stock is weighted in proportion to its total market value.

The Fund is passively managed. It invests primarily in the stocks that make up the S&P MidCap Index so that the weighting of each stock in the portfolio approximates the index. The Manager's goal is to maintain a return correlation of at least .95 to the S&P MidCap Index (a return correlation of 1.0 is perfect). Under normal market conditions, it is the Fund's policy to invest at least 80% of its total assets in the underlying stocks of the index. As a rule of thumb, the percentage will generally be higher.

Like many index funds, the Fund may invest in futures contracts and lend securities to minimize the performance variation between the Fund and the index. This performance gap occurs because, unlike the index, the Fund must pay operating expenses and contend with the flow of cash in and out of the portfolio. While we expect the Fund's performance to closely represent the index, the Fund will generally underperform the index.

PRINCIPAL RISKS

The stock market goes up and down every day. As with any investment whose performance is linked to these markets,

SECTOR BREAKDOWNS

as of November 30, 2009

Industry	% of Fund
Consumer, Non-Cyclical	21.0%
Industrial	17.7%
Financial	17.3%
Consumer, Cyclical	14.1%
Technology	7.3%
Energy	6.8%
Utilities	5.9%
Basic Materials	5.4%
Communications	4.5%

MidCap Stocks

The stocks that are represented in the S&P MidCap 400 Index make up about 7.9% of the total market index, as measured by the S&P 1500 Index. The S&P MidCap 400 Index was designed to track the overall performance of the mid cap sector. As of November 30, 2009, the individual stocks that make up the index have total market values ranging in size from \$279 million to \$7.1 billion. The median market value is \$2.1 billion.

The index is made up of stocks from many diverse industries. The industry table above gives you a general idea of the exposure to specific sectors.

the value of an investment in the Fund will change. During a declining stock market, an investment in this Fund would lose money.

The Fund is primarily invested in the U.S. stock market and is designed to passively track the performance of the mid cap sector. In an attempt to accurately track the performance of the S&P MidCap 400 Index, the Fund does not intend to take steps to reduce its market exposure in any market.

Many factors will affect the performance of the stock market. Two major factors are economic and political events. The impact of positive or negative events could be short-term (by causing a change in the market that is corrected in a year or less) or long-term (by causing a change in the market that may last for many years). Events may affect one sector of the economy or a single stock, but may not have a significant impact on the overall market.

The Fund invests in medium-sized companies from many sectors. In doing so, the Fund is not as sensitive to the movements of a single company's stock or a single economic sector. However, during periods where investment alternatives such as large cap stocks, small cap stocks, bonds and money market instruments out-perform mid cap stocks, we expect the performance of the Fund to underperform other mutual funds that invest in these alternatives.

The S&P MidCap Index is a capitalization weighted index, meaning companies are weighted based on their size. Thus, poor performance of the largest of these medium sized companies could result in negative performance of the index and the Fund.

Although the Fund's primary risks are associated with changes in the stock market, there are other risks associated with the Fund. These risks generally apply to how well the Fund tracks the index. For example, the Fund invests in futures contracts to the extent that it holds cash in the portfolio. If these futures contracts do not track the index, the Fund's performance relative to the index will change.

Some mutual funds lend portfolio securities in order to offset expenses. The Fund has never engaged in this strategy, however, in the event that it did, there is a risk that the practice could negatively impact the share price of the Fund.

OTHER RISKS OF THE FUND

Under normal circumstances the Fund may follow a number of investment policies to achieve its objective. The Fund may invest in stock futures. Losses involving futures can sometimes be substantial, in part because a relatively small price movement in a futures contract may result in an immediate and substantial loss for the Fund. In an effort to minimize this risk, the Fund will not use futures for speculative purposes or as leverage. It is the Fund's policy to hold cash deposits equal or greater than the total market value of any futures position. The value of all futures and options contracts in which the Fund acquires an interest will not exceed 20% of current total assets.

IS IT RIGHT FOR YOU?

If you are looking for a diversified stock fund, this Fund may be right for you. You should be comfortable with the volatility of the stock market and the risk that your investment could decline in value.

PERFORMANCE

The following chart and table show the variability of the Fund's performance from year to year. The table compares the performance of the Fund with a benchmark index. These figures assume that all distributions are reinvested. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and

do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts. It is important to remember that past performance does not accurately predict future performance.

S&P SmallCap Index Fund

Ticker Symbol: SMLKX

GOAL

Attempt to replicate the performance of small-sized U.S. companies as measured by the S&P SmallCap 600 Stock Index.

The S&P SmallCap Index Fund is a diversified mutual fund that seeks to provide investment results that correspond to the total return of publicly traded common stocks of small-sized companies, as represented by the S&P SmallCap 600 Index.

PRINCIPAL STRATEGY

The S&P SmallCap 600 Index includes common stocks of 600 small U.S. companies from a broad range of industries. Standard & Poor's, the company that maintains the index, makes all determinations regarding the inclusion of stocks in the index. Each stock is weighted in proportion to its total market value.

The Fund is passively managed. It invests primarily in the stocks that make up the S&P Small Cap 600 Index so that the weighting of each stock in the portfolio approximates the index. The Manager's goal is to maintain a return correlation of at least .95 to the S&P SmallCap 600 Index (a return correlation of 1.0 is perfect). Under normal market conditions, it is the Fund's policy to invest at least 80% of its total assets in the underlying stocks. As a rule of thumb, the percentage will generally be higher.

Like many index funds, the Fund may invest in futures contracts and lend securities to minimize the performance variation between the Fund and the index. This performance gap occurs because, unlike the index, the Fund must pay operating expenses and contend with the flow of cash in and out of the portfolio. While we expect the Fund's performance to closely represent the index, the Fund will generally underperform the index.

PRINCIPAL RISKS

The stock market goes up and down every day. As with any investment whose performance is linked to these markets,

SECTOR BREAKDOWNS

as of November 30, 2009

Industry	% of Fund
Industrial	19.9%

Consumer, Cyclical	15.8%
Technology	10.3%
Energy	5.2%
Communications	5.0%
Utilities	4.4%
Basic Materials	3.1%

SmallCap Stocks

The stocks that are represented in the S&P SmallCap 600 Index make up about 3.5% of the total market index, as measured by the S&P 1500 Index. As of November 30, 2009, the individual stocks that make up the index have market values ranging in size from \$43 million to \$2.7 billion. The median market value is \$569 million.

Over long periods of time, small cap stocks have generally outperformed other segments of the market. In doing so, they also have more volatility in share price. While many investors believe small cap stocks are the best choice for long-term holdings, there can be no assurance that this trend will continue.

the value of an investment in the Fund will change. During a declining stock market, an investment in this Fund would lose money.

The Fund is primarily invested in the U.S. stock market and is designed to passively track the performance of the small cap sector. In an attempt to accurately track the performance of the S&P SmallCap 600 Index, the Fund does not intend to take steps to reduce its market exposure in any market.

Many factors will affect the performance of the stock market. Two major factors are economic and political events. The impact of positive or negative events could be short-term (by causing a change in the market that is corrected in a year or less) or long-term (by causing a change in the market that lasts for many years). Events may affect one sector of the economy or a single stock, but may not have a significant impact on the overall market.

The Fund invests in small-sized companies from many sectors. In doing so, the Fund is not as sensitive to the movements of a single company's stock or a single economic sector. However, during periods where investment alternatives such as large cap stocks, mid cap stocks, bonds and money market instruments outperform small cap stocks, we expect the performance of the Fund to underperform other mutual funds that invest in these alternatives.

The S&P SmallCap 600 Index is a capitalization weighted index, meaning companies are weighted based on their size. Thus, poor performance of the largest of these small sized companies could result in negative performance of the index and the Fund.

Although the Fund's primary risks are associated with changes in the stock market, there are other risks associated with the Fund. These risks generally apply to how well the Fund tracks the index. For example, the Fund invests in futures contracts to the extent that it holds cash in the portfolio. If these futures contracts do not track the index, the Fund's performance relative to the index will change.

Some funds lend portfolio securities in order to offset expenses. The Fund has never engaged in this strategy, however, in the event that it did, there is a risk that the practice could negatively impact the share price of the Fund.

OTHER RISKS OF THE FUND

Under normal circumstances the Fund may follow a number of investment policies to achieve its objective. The Fund may invest in stock futures. Losses involving futures can sometimes be substantial, in part because a relatively small price movement in a futures contract may result in an immediate and substantial loss for the Fund. In an effort to minimize this risk, the Fund will not use futures for speculative purposes or as leverage. It is the Fund's policy to hold cash deposits equal or greater than the total market value of any futures position. The value of all futures and options contracts in which the Fund acquires an interest will not exceed 20% of current total assets.

IS IT RIGHT FOR YOU?

If you are looking for a diversified stock fund, this Fund may be right for you. You should be comfortable with the volatility of the stock market and the risk that your investment could decline in value.

PERFORMANCE

The following chart and table show the variability of the Fund's performance from year to year. The table compares the performance of the Fund with a benchmark index. These figures assume that all distributions are reinvested. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts. It is important to remember that past performance does not accurately predict future performance.

Shareholder Fees

Sales and redemption charges **none**

Annual Operating Expenses

(expenses that are deducted from Fund assets)

Management Fees 0.50%

Distribution (12b-1) Fees 0.25%

Other Expenses 0.81%

Total Annual Operating Expenses 1.56%

Expense Reimbursement* (0.32)%

Net Annual Fund Operating Expense 1.24%**

Example of Expenses

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 year	3 years	5 years	10 years
\$ 126	\$ 461	\$ 820	\$1,829

“Standard & Poor’s”, “S&P”, and “Standard and Poor’s SmallCap 600 Index” are trade marks of McGraw Hill Cos., Inc. and have been licensed for use by the Fund. The Fund is not sponsored, endorsed, sold or promoted by S&P and S&P makes no representation regarding the advisability of investing in the Fund.

* The Manager may be reimbursed for any foregone advisory fees or unreimbursed expenses within three fiscal years following a particular reduction or expense, but only to the extent the reimbursement does not cause the Fund to exceed any applicable expense limit and the effect of the reimbursement is measured after all ordinary operating expenses are calculated. Any such reimbursement is subject to the Board of Trustees' review and approval.

** The Manager has agreed to further limit the Fund's expenses at 1.24%. This limitation is guaranteed through 12/31/10.

FINANCIAL HIGHLIGHTS

The financial highlights table is intended to help you understand the Fund's performance for the past five fiscal years. Certain information reflects financial results of a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been audited by Tait, Weller & Baker LLP, whose report, along with the Fund's financial statements, are included in the Annual Report, which is available upon request.

Equity Income Fund

Ticker Symbol: EQTKX

GOAL

Achieve a high level of income and capital appreciation (when consistent with high income) by investing primarily in income-producing U.S. equity securities.

The Equity Income Fund is a diversified mutual fund that seeks a high level of current income by investing primarily in income producing equity securities. As a secondary objective, the Fund will also consider the potential for price appreciation when consistent with seeking current income.

PRINCIPAL STRATEGY

In order to meet the investment goal, the Fund invests primarily in securities which generate a relatively high level of dividend income and have potential for capital appreciation. These securities will generally be stocks of medium and large U.S. corporations. It is the Fund's policy that under normal market conditions it will invest at least 80% of its total assets in stocks.

Although the Fund will attempt to invest as much of its assets as is practical in income-producing stocks, the Fund may maintain a reasonable position in high-quality, short-term debt securities and money market instruments to meet redemption requests and other liquidity needs.

The Fund will invest in futures contracts when the Manager wishes to remain fully invested in the market. Utilizing futures allows the Manager to maintain a high percentage of the portfolio in the market while maintaining cash for liquidity needs.

PRINCIPAL RISKS

The stock market goes up and down every day. As with any investment whose performance is linked to these markets, the value of an investment in the Fund will change. During a declining stock market, an investment in this Fund would lose money.

The Fund is primarily invested in U.S. value stocks and is designed to provide a dividend yield as well as potential for

SECTOR BREAKDOWNS

as of November 30, 2009

Industry	% of Fund
Consumer, Non-Cyclical	31.6%
Consumer, Cyclical	16.3%
Financial	13.4%
Energy	10.4%
Industrial	8.4%
Technology	7.2%
Communications	5.0%
Utilities	4.3%
Basic Materials	3.4%

Value Stocks

The Fund invests primarily in value stocks and stocks that, in the opinion of the Manager, have attractive yield and/or capital appreciation opportunities. "Value stock" is a generic term and has many definitions in the market place. Generally, it is used to describe a stock that an investor considers to have a low price relative to other stocks. Among others, common characteristics of a value stock may include a high dividend yield, low price-earnings ratio and/or low price-to-book ratio relative to a specific market index or another stock.

The Fund is made up of stocks from diverse industries. The table above gives you a general idea of the exposure to specific sectors as of November 30, 2009.

capital appreciation. At times the Fund may hold a concentrated position in the banking and financial sector, therefore the Funds' performance may be significantly impacted by the performance of this sector.

Many factors will affect the performance of the stock market. Two major factors are economic and political events. The impact of positive or negative events could be short-term (by causing a change in the market that is corrected in a year or less) or long-term (by causing a change in the market that may last for many years). Events may affect one sector of the economy or a single stock, but may not have a significant impact on the overall market.

The Fund invests in large and medium-sized companies from many sectors. In doing so, the Fund is not as sensitive to the movements of a single company's stock or a single economic sector. However, during periods where investment alternatives such as growth stocks, small cap stocks, bonds and money market instruments outperform value stocks, we expect the performance of the Fund to underperform other mutual funds that invest in these alternatives.

The Fund's primary risks are associated with changes in the stock market, however, there are other risks associated with the Fund. For example, the Fund may invest in futures contracts to the extent that it holds cash in the portfolio. If these futures contracts owned by the Fund do not perform well, the Fund's performance will be impacted.

Some mutual funds are able to lend portfolio securities in order to offset expenses. The Fund has never engaged in this strategy, however, in the event that it did, there is a risk that the practice could negatively impact the net assets value of the Fund.

OTHER RISKS OF THE FUND

Under normal circumstances the Fund may follow a number of investment policies to achieve its objective. The Fund may invest in stock futures. Losses involving futures can sometimes be substantial in part because a relatively small price movement in a futures contract may result in an immediate and substantial loss for the Fund. In an effort to minimize this risk, the Fund will not use futures for speculative purposes or as leverage. It is the Fund's policy to hold cash deposits equal or greater than the total market value of any futures position. The value of all futures and options contracts in which the Fund acquires an interest will not exceed 20% of current total assets.

IS IT RIGHT FOR YOU?

If you are looking for a conservative, value oriented stock fund, this Fund may be right for you. You should be comfortable with the changing values of the stock market and the risk that your investment could decline in value.

PERFORMANCE

The following chart and table show the variability of the Fund's performance from year to year. The table compares the performance of the Fund with a benchmark index. These figures assume that all distributions are reinvested. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns

shown are not relevant to investors who hold their fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts. It is important to remember that past performance does not accurately predict future performance.

Nasdaq-100 Index Fund

Ticker Symbol: NDXKX

GOAL

Attempt to replicate the performance of the largest non-financial companies as measured by the Nasdaq-100 Index®.

PRINCIPAL STRATEGY

The Fund is managed passively in that the Manager is seeking to replicate the performance of the Nasdaq-100 Index®. To do this, the Fund invests primarily in the stocks comprising this index. The Fund will attempt to buy stocks so that the holdings in the portfolio approximate those of the Nasdaq-100 Index®. The Manager's goal is to maintain a return correlation of at least 0.95 to the Nasdaq-100 Index® (a return correlation of 1.0 is perfect). Under normal market conditions, it is the Fund's policy to invest at least 80% of its total assets in the stocks comprising the index.

The Fund may invest in securities issued by other investment companies if those companies invest in securities consistent with the Fund's investment objective and policies.

Like most index funds, the Fund may invest in futures contracts. The Fund generally maintains some short-term securities and cash equivalents in the portfolio to meet redemptions and needs for liquidity. The Manager will typically buy futures contracts so that the market value of the futures contracts is as close to the cash balance as possible. This helps minimize the tracking error of the Fund.

PRINCIPAL RISKS

The stock markets go up and down every day. As with any investment whose performance is linked to these markets, the value of your investment in the Fund will fluctuate. If the Fund's value drops during the period in which you hold the Fund, you could lose money.

The Fund primarily invests in U.S. stocks and is designed to track the overall performance of the Nasdaq-100 Index®. In an attempt to accurately represent the Index, the Fund will typically not take steps to reduce its market exposure so that in a declining market, the Manager will not take steps to minimize the exposure of the Fund.

Many factors will affect the performance of the stock markets. Two major factors that may have both a positive and negative effect on the stock markets are economic and political events. These effects may be short-term by causing a change in the market that is corrected in a year or less; or they may have long-term impacts which may cause changes in the market that may last for many years. Some fac-

THE NASDAQ-100 INDEX®

as of November 30, 2009

The Nasdaq-100 Index® is made up of the 100 largest non-financial stocks traded on the Nasdaq Stock Market. The stocks that make up this index are currently heavily weighted in the technology sector. Because of the concentration in a specific sector, high volatility or poor performance of the sector will directly affect the Fund's performance.

The individual stocks that make up the index have total market values ranging in size from \$2.5 billion to \$261.1 billion, with a median of \$8.0 billion.

tors may affect changes in one sector of the economy or one stock, but don't have an impact on the overall market. The particular sector of the economy or the individual stock may be affected for a short or long-term.

The Fund invests in the largest, non-financial companies that are traded on the Nasdaq Stock Market. They may comprise various sectors of the economy, but are currently concentrated in the technology sector. During periods in which the Nasdaq-100 Index underperforms alternative investments such as bond, money market and alternative stock sectors, the Manager expects the Fund to underperform other mutual funds that invest in these alternative categories.

The Nasdaq-100 Index is subject to concentration risk. First, it is a modified-capitalization weighted index, meaning that except for some modifications, companies are weighted based on their size. Thus, poor performance of the largest companies within the index could result in negative performance of the index and the Fund. Additionally, the significant concentration of technology stocks makes the Fund's performance particularly sensitive to this specific sector. Negative performance in the technology sector will result in negative fund performance.

To the extent the Fund invests in securities issued by other investment companies, the Fund, as a shareholder in another investment company, bears its ratable share of that investment company's expenses, including advisory and administration fees, resulting in an additional layer of management fees and expenses for Fund shareholders.

OTHER RISKS OF THE FUND

The Fund's primary risks are associated with changes in the stock market, however, there are other risks associated with the Fund. These risks generally apply to how well the Fund tracks the index. For example, the Fund invests in futures contracts to the extent that it holds cash in the portfolio. If the futures contracts owned by the Fund do not track the index, the Fund's performance relative to the index will change.

Some mutual funds are able to lend portfolio securities in order to offset expenses. The Fund does not expect to engage in this strategy; however, in the event that it did, there is a slight risk that this practice could negatively impact the net assets value of the Fund.

IS IT RIGHT FOR YOU?

If you are looking for a growth stock fund, this fund may be right for you. You should be comfortable with the changing values of the stock market and the risk that your investment could decline in value. Historically, the index has shown more volatility in comparison to other broader benchmarks such as the S&P 500 Index.

PERFORMANCE

The following chart and table show the variability of the Fund's performance from year to year. The table compares the performance of the Fund with a benchmark index. These figures assume that all distributions are reinvested. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts. It is important to remember that past performance does not accurately predict future performance.

(a) Calculated based upon average shares outstanding.

European Growth & Income Fund

Ticker Symbol: EUGKX

GOAL

Provide long-term capital appreciation and income by investing in large-sized European companies.

PRINCIPAL STRATEGY

The Fund seeks to invest primarily in the stocks of large-sized companies located in Europe. In selecting securities, the Fund attempts to use the Dow Jones European STOXX 50 Index as a target portfolio and a basis for selecting investments. Most companies considered for the Fund will have market capitalizations of at least \$10 billion (U.S. dollars).

The Fund invests principally using American Depository Receipts, commonly referred to as ADRs. ADRs are traded on U.S. stock exchanges and are available for some, but not all, securities that make up the target portfolio. If a company that is in the target portfolio does not have an ADR available on a U.S. exchange or if, in the Manager's opinion, the Fund is better served, the Manager will invest in ADRs of other companies that the Manager believes best serve the Fund and its investors.

The Fund is not considered an index fund because it will not attempt to precisely track the performance or invest in securities that make up the Dow Jones European STOXX 50 Index. However, similar to index funds, the Fund will generally remain fully invested and its performance will track the Dow Jones European STOXX 50 Index to the extent that the Fund is successful in investing in the companies that make up the index. Additionally, the Manager will attempt to minimize portfolio turnover.

Under normal market conditions, it is the Fund's policy to invest 80% of its total assets in ADRs of companies located in Europe. At the Manager's option, the Manager may elect to purchase futures contracts and/or options to attempt to remain fully invested in the markets. This percentage of futures and/or options held in the portfolio will typically not exceed the cash (or cash equivalents) balance of the Fund.

PRINCIPAL RISKS

The stock markets go up and down every day. As with any investment whose performance is linked to these markets, the value of your investment in the Fund will fluctuate. If the Fund's value drops during the period in which you hold the Fund, you could lose money.

Although the Fund principally invests in ADRs which are traded in U.S. denominations on U.S. stock markets, there is still some underlying foreign investment risk. For example, because foreign companies operate differently than U.S. companies, the Fund may encounter risks not typically associated with those of U.S. companies. For instance, foreign companies are not subject to the same accounting, auditing, and financial reporting standards and procedures as required of U.S. companies, and their stocks may not be as liquid as the stocks of similar U.S. companies. In addition, foreign stock exchanges, brokers, and companies generally have less government supervision and regulation than their counterparts in the United States. These factors, among others, could negatively impact the return of the Fund.

When investing in an international fund such as this Fund, there is always country risk, which is the chance that a country's economy will be hurt by political troubles, financial problems, or natural disasters.

There is also currency risk which is the chance that returns will be hurt by a rise in the value of one currency against the value of another.

There is also liquidity risk with ADRs, some of which may have a low daily trading volume. In the event the Fund is forced to liquidate its holdings of an ADR with limited trading volume, it is likely that the Fund would be forced to sell the ADR at a price lower than what it might otherwise receive.

There is a risk that the dividend policies of the companies that comprise the Dow Jones European STOXX 50 may change and the Fund's ability to produce income may be negatively impacted.

OTHER RISKS OF THE FUND

Under normal circumstances the Fund may follow a number of investment policies to achieve its objective. The Fund may invest in futures contracts and options. Losses involving futures and options can sometimes be substantial, in part because a relatively small price movement in a futures contract or an option may result in an immediate and substantial loss for the Fund. In an effort to minimize this risk, the Fund will not use futures or options for speculative purposes or as leverage. It is the Fund's policy to hold cash deposits equal to or greater than the total market value of any futures and/or options position. The value of all futures contracts and/or options in which the Fund acquires an interest will not exceed 20% of current total assets.

IS IT RIGHT FOR YOU?

The Fund may be a suitable investment for you if you wish to add an international stock fund to your existing holdings, which could include other stock, bond and money market investments. You should be willing to accept the additional risks associated with international investments.

PERFORMANCE

The following chart and table show the variability of the Fund's performance from year to year. The table compares the performance of the Fund with a benchmark index. These figures assume that all distributions are reinvested. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts. It is important to remember that past performance does not accurately predict future performance.

Best Quarter: 23.55% (Q2, 2009)

Worst Quarter: -18.04% (Q4, 2008)

Year to date performance as of 11/30/09: 26.69%

Date of inception: 10/16/03

Average Annual Returns As Of 12/31/08

<u>European Growth & Income Fund</u>	<u>1 year</u>	<u>5 years</u>	<u>Since Inception</u>
Return Before Taxes	(38.82)%	0.78%	3.06%

Fund Fees & Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees

Sales and redemption charges **none**

Annual Operating Expenses

(expenses that are deducted from Fund assets)

Management Fees 0.85%

Distribution (12b-1) Fees 0.25%

Other Expenses 0.89%

Total Annual Operating Expenses 1.99%

Expense Reimbursement* (0.49)%

Net Annual Fund Operating Expense 1.50%**

Example of Expenses

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 year	3 years	5 years	10 years
\$ 153	\$ 577	\$1,027	\$2,277

* The Manager may be reimbursed for any foregone advisory fees or unreimbursed expenses within three fiscal years following a particular reduction or expense, but only to the extent the reimbursement does not cause the Fund to exceed any applicable expense limit and the effect of the reimbursement is measured after all ordinary operating expenses are calculated. Any such reimbursement is subject to the Board of Trustees' review and approval.

** The Manager has agreed to further limit the Fund's expenses at 1.50%. This limitation is guaranteed through 12/31/10.

FINANCIAL HIGHLIGHTS

The financial highlights table is intended to help you understand the Fund's performance for the past five fiscal years. Certain information reflects financial results of a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been audited by Tait, Weller & Baker LLP, whose report, along with the Fund's financial statements, are included in the Annual Report, which is available upon request.

U.S. Government Securities Fund

Ticker Symbol: CAUKX

GOAL

Seek liquidity, safety from credit risk and as high a level of income as is consistent with these objectives by investing in full faith and credit obligations of the U.S. government and its agencies or instrumentalities, primarily Government National Mortgage Association Certificates (“GNMA”).

PRINCIPAL STRATEGY

The Fund invests primarily in high-quality bonds whose interest is guaranteed by the full faith and credit of the United States government and its agencies or instrumentalities.

WHAT IS THE MANAGER’S APPROACH?

The Manager selects securities that it believes will provide the best balance between risk and return within the Fund’s range of allowable investments. Generally, the Manager selects a balance between treasury bonds and GNMA securities in an attempt to maximize the overall performance of the Fund. In managing the portfolio, a number of factors are considered including general market and economic conditions and their likely effects on the level and term-structure of interest rates, yield spreads, and mortgage prepayment rates on GNMA pass-through securities. While income is the most important part of return over time, the total return for a bond fund includes both income and price losses and gains. Under normal market conditions, it is the Fund’s policy to invest at least 80% of its total assets in securities issued by the U.S. government and its agencies or instrumentalities, but as a general rule the percentage will be much higher.

PRINCIPAL RISKS

The Fund is subject to several risks, any of which could cause the Fund to lose money. These include:

Interest rate risk, which is the chance that bond prices overall will decline over short and long-term periods due to rising interest rates. This is the primary risk of this Fund.

Income risk, which is the chance that declining interest rates will reduce the amount of income paid by the Fund over long periods of time.

Call risk, which is the chance that during declining interest rates, the bond issuer will call or prepay a high-yielding bond before the bond’s maturity date. This would force the Fund to purchase lower yielding bonds which would reduce the income generated from the portfolio and could potentially result in capital gains paid out by the Fund.

Prepayment risk is similar to call risk. In the case of GNMA securities, payments to the Fund are based on payments from the underlying mortgages. During periods where homeowners refinance their mortgages, these securities are paid off and the Fund may have to reinvest the principal in lower yielding securities. This would reduce the income generated from the portfolio.

Manager risk, which is the chance that poor security selection will cause the Fund to underperform other mutual funds with similar investment objectives.

The Fund invests in intermediate and long-term fixed income securities. During periods where investment alternatives such as stocks and money market instruments outperform bonds, we expect the performance of the Fund to underperform other mutual funds that invest in these alternatives.

IS IT RIGHT FOR YOU?

If you are looking for a conservative income fund, this Fund may be right for you. You should be comfortable with the changing values of the bond market and the risk that your investment could decline in value.

PERFORMANCE

The following chart and table show the variability of the Fund's performance from year to year. The table compares the performance of the Fund with benchmark indices. These figures assume that all distributions are reinvested. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts. It is important to remember that past performance does not accurately predict future performance.

Short-Term U.S. Government Bond Fund

Ticker Symbol: STUKX

GOAL

Seek liquidity, safety from credit risk, preservation of investors principal and as high a level of income as is consistent with these objectives by investing in mainly U.S. government securities.

PRINCIPAL STRATEGY

The Fund typically invests in short and intermediate-term fixed income securities whose principal and interest are backed by the full faith and credit of the U.S. Federal Government and its agencies or instrumentalities. The Manager will invest at least 80% of the Fund's assets in securities issued by the U.S. government and its agencies or instrumentalities. In addition, the Manager may invest in higher yielding securities which are not backed by the full faith and credit of the U.S. Federal Government. The Fund intends to maintain an average duration between 0 and 3 years in an effort to reduce share price volatility.

WHAT IS THE MANAGER'S APPROACH?

The Manager selects securities that it believes will provide the best balance between risk and return within the Fund's range of allowable investments. The Manager's investments will typically consist of full faith and credit obligations of the U.S. Federal Government and its agencies or instrumentalities, as well as other securities which the Manager believes will enhance the Fund's total return. The Manager considers a number of factors, including general market and economic conditions, to balance the portfolio. While income is the most important part of return over time, the total return from a bond or note includes both income and price gains or losses. The Fund's focus on income does not mean it invests only in the highest-yielding securities available, or that it can avoid losses of principal.

PRINCIPAL RISKS

This Fund tends to be conservative in nature. However, it is subject to several risks, any of which could cause the Fund to lose money. These include:

Interest rate risk, which is the chance that bond prices overall will decline over short and long-term periods due to rising interest rates.

Income risk, which is the chance that declining interest rates will reduce the amount of income paid by the Fund. Income risk is generally moderate for short and intermediate-term bonds.

Call risk, which is the chance that during declining interest rates, the bond issuer will call or prepay a high-yielding bond before the bond's maturity date. This would force the Fund to purchase lower yielding bonds which would reduce the income generated from the portfolio and could potentially result in capital gains paid out by the Fund.

Prepayment risk is similar to call risk. In the case of GNMA securities, payments to the Fund are based on payments from the underlying mortgages. During periods where homeowners refinance their mortgages, these securities are paid off and the Fund may have to reinvest the principal in lower yielding securities. This would reduce the income generated from the portfolio.

Manager risk, which is the chance that the Manager's security selection strategy may cause the Fund to underperform other mutual funds with similar investment objectives.

IS THE FUND RIGHT FOR YOU?

The Fund may be suitable for you if you have a short to intermediate-term investment horizon and want to earn dividend income from your investment. The Fund may be appropriate for investors in regular accounts and retirement accounts who want to avoid credit risk but are comfortable with some volatility of the Fund's share price.

PERFORMANCE

The following chart and table show the variability of the Fund's performance from year to year. The table compares the performance of the Fund with a benchmark index. These figures assume that all distributions are reinvested. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts. It is important to remember that past performance does not accurately predict future performance.

(b) Calculated based upon average shares outstanding.

The United States Treasury Trust

Ticker Symbol: UTKXX

GOAL

Seek capital preservation, safety, liquidity, and, consistent with these objectives, the highest attainable current income exempt from state income taxes. The Fund will invest its assets only in short-term U.S. Treasury securities and its income will be exempt from California (and most other states) personal income taxes.

PRINCIPAL STRATEGY

The Fund primarily invests its assets in high-quality, short-term Treasury bills whose interest is guaranteed by the full faith and credit of the United States government. The Fund generally buys only securities that mature in 397 days or less. The Fund's weighted average maturity will generally be less than 90 days. Under normal market conditions, it is the Fund's policy to invest at least 80% of its total assets in securities issued by the U.S. government, but as a general rule the percentage is much higher.

WHAT IS THE MANAGER'S APPROACH?

The Manager selects securities that it believes will attain the highest possible yield and maintain the \$1.00 per share price. The Manager generally purchases only U.S. Treasury bills, notes and bonds, but may invest in other securities from time to time. Under normal market conditions, it is the Fund's policy to invest at least 80% of its total assets in securities issued by the U.S. government, but as a general rule the percentage will be much higher.

PRINCIPAL RISKS

The Fund is subject to some risks which could cause the Fund to lose money. It is important to remember that this Fund is not a FDIC-insured money market account. The risks include:

Interest rate risk, which is the chance that short-term security prices overall will decline due to rising interest rates. In an extreme case, a short-term movement could potentially change the Fund's share price to something other than the \$1.00 target.

Income risk, which is the chance that declining interest rates will reduce the amount of income paid by the Fund.

Manager risk, which is the chance that poor security selection will cause the Fund to underperform other mutual funds with similar investment objectives.

The securities that the Fund holds are backed by the full faith and credit of the United States federal government and are those that the Manager believes do not represent credit risk to the Fund. It is important to note that the U.S. government backs the securities held by the Fund, but not the Fund itself.

An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency. Although the Fund seeks to preserve the \$1.00 per share price, it is possible to lose money by investing in the Fund.

IS IT RIGHT FOR YOU?

The Fund may be appropriate for those seeking a cash management account and investors who wish to protect their investment from volatile markets. It may be used in retirement accounts such as 401(k)s and IRAs. Lastly, the Fund's dividends are generally not subject to state personal income taxes. Thus, investors who pay a high rate of state income taxes may benefit from this feature.

PERFORMANCE

The following chart and table show the variability of the Fund's performance from year to year. These figures assume that all distributions are reinvested. It is important to remember that past performance does not accurately predict future performance.

Example of Expenses

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 year	3 years	5 years	10 years
\$ 105	\$ 398	\$ 713	\$1,606

* The Manager may be reimbursed for any foregone advisory fees or unreimbursed expenses within three fiscal years following a particular reduction or expense, but only to the extent the reimbursement does not cause the Fund to exceed any applicable expense limit and the effect of the reimbursement is measured after all ordinary operating expenses are calculated. Any such reimbursement is subject to the Board of Trustees' review and approval.

** The Manager has agreed to further limit the Fund's expenses at 1.03%. This limitation is guaranteed through 12/31/10.

FINANCIAL HIGHLIGHTS

The financial highlights table is intended to help you understand the Fund's performance for the past five fiscal years. Certain information reflects financial results of a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been audited by Tait, Weller & Baker LLP, whose report, along with the Fund's financial statements, are included in the Annual Report, which is available upon request.

THE UNITED STATES TREASURY TRUST	Year Ended August 31,				
	2009	2008	2007	2006	2005
Net asset value, beginning of year	\$ 1.000	\$ 1.000	\$ 1.000	\$ 1.000	\$ 1.000
INCOME FROM INVESTMENT OPERATIONS					
Net investment income ^(b)	—	0.017	0.039	0.032	0.012
LESS DISTRIBUTIONS					
Dividends from net investment income	—	(0.017)	(0.039)	(0.032)	(0.012)
Net asset value, end of year	<u>\$ 1.000</u>	<u>\$ 1.000</u>	<u>\$ 1.000</u>	<u>\$ 1.000</u>	<u>\$ 1.000</u>
 Total return	 0.04%	 1.70%	 4.02%	 3.22%	 1.22%
RATIOS / SUPPLEMENTAL DATA					
Net assets, end of year (in 000's)	\$ 3,302	\$ 2,737	\$ 2,894	\$ 2,487	\$ 2,490
Ratio of expenses to average net assets:					
Before expense reimbursements	0.97%*	1.29%	1.28%	1.30%	1.25%
After expense reimbursements	0.35%*	1.03%	1.03%	1.03%	0.99%
Ratio of net investment income to average net assets:					
Before expense reimbursements	(0.59)%*	1.47%	3.70%	3.11%	1.08%
After expense reimbursements	0.03%*	1.73%	3.95%	3.38%	1.34%

(b) Calculated based upon average shares outstanding.

* Includes Temporary Guarantee Program expense and negative yield waiver adjustment.

FUND MANAGEMENT

The investment adviser for the Funds is CCM Partners, 44 Montgomery Street, Suite 2100, San Francisco, CA 94104. CCM Partners manages \$533 million in mutual fund assets as of 8/31/09 and has been managing mutual funds since 1985. CCM Partners is responsible for managing the portfolios and handling the administrative requirements of the Funds. As compensation for managing the portfolios, CCM Partners receives a management fee from each Fund. For the fiscal year ended 8/31/09 the fees, net of reimbursements, were 0.02% for the S&P 500 Index Fund; 0.28% for the S&P MidCap Index Fund; 0.18% for the S&P SmallCap Index Fund; 0.50% for the Equity Income Fund; 0.38% for the U.S. Government Securities Fund; 0.00% for The United States Treasury Trust; 0.00% for the Nasdaq-100 Index Fund; 0.14% for the Short-Term U.S. Government Bond Fund; and 0.36% for the European Growth & Income Fund. A discussion regarding the basis for the Board's approval of the investment advisory agreements for each Fund is available in the Fund's annual report for the fiscal year ended August 31, 2009.

Stephen C. Rogers has been the portfolio manager for the S&P 500 Index Fund, S&P MidCap Index Fund, S&P SmallCap Index Fund, European Growth & Income Fund, Nasdaq-100 Index Fund and the Equity Income Fund since 2003. Mr. Rogers is a member of the portfolio management team for the Bond Funds and the Money Market Funds. He joined CCM Partners in 1993 and serves as Chief Executive Officer of CCM Partners. Mr. Rogers graduated from the University of Iowa in 1988 and earned his MBA from the University of California at Berkeley in 2000.

Christopher P. Browne, CFA, has been the portfolio manager for the California Tax-Free Income Fund, the California Insured Intermediate Fund, the U.S. Government Securities Fund, the Short-Term U.S. Government Bond Fund, the California Tax-Free Money Market Fund and The United States Treasury Trust since 2004. Prior to joining CCM Partners, Mr. Browne worked in a variety of investment evaluation roles in asset management companies such as: Autodesk Ventures, Dresdner Kleinwort Benson, Harris Bretall Sullivan & Smith, and Pacific Income Advisers. Mr. Browne graduated from the University of California, Santa Barbara in 1990 and earned his MBA, with honors, from Thunderbird, the American Graduate School of International Management in 1998. He has earned the right to use the Chartered Financial Analyst (CFA) designation and is a member of the CFA Society of San Francisco, as well as Beta Gamma Sigma.

The SAI provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers and the portfolio managers' ownership of securities of the Funds.

When referring to the Bond Funds, we are discussing the U.S. Government Securities Fund and the Short-Term U.S. Government Bond Fund. The Money Market Fund refers to The United States Treasury Trust. Our Stock Funds include the S&P 500 Index Fund, S&P MidCap Index Fund, S&P SmallCap Index Fund, European Growth & Income Fund, Nasdaq-100 Index Fund and the Equity Income Fund.

ADDITIONAL INVESTMENT RELATED RISKS

PORTFOLIO TURNOVER

Except for the Money Market Funds, the Funds generally intend to purchase securities for long-term investments rather than short-term gains. However, a security may be held for a shorter than expected period of time if, among other things, the Manager needs to raise cash or feels that it is appropriate to do so. Portfolio holdings may also be sold sooner than anticipated due to unexpected changes in the markets. Buying and selling securities may involve incurring some expense to a fund, such as commissions paid to brokers and other transaction costs. By selling a security, a Fund may realize taxable capital gains that it will subsequently distribute to shareholders. Generally speaking, the higher a Fund's annual portfolio turnover, the greater its brokerage costs and the greater likelihood that it will realize taxable capital gains. Increased brokerage costs may affect a Fund's performance. Also, unless you are a tax-exempt investor or you purchase shares through a tax-deferred account, the distributions of capital gains may affect your after-tax return. For some Funds annual portfolio turnover of 100% or more is considered high.

TEMPORARY DEFENSIVE POSITIONS

In drastic market conditions, the Manager may sell all or some of a Fund's securities (except those of the Money Market Funds) and temporarily invest that Fund's money in U.S. government securities or money market instruments backed by U.S. government securities, if it believes it is in the best interest of shareholders to do so. As of the date of this Prospectus, this has never happened; but if it were to occur, the investment goals of the relevant Funds may not be achieved.

VALUATION RISK

Some or all of the securities held by a Fund may be valued using "fair value" techniques, rather than market quotations, under the circumstances described in this Prospectus under "How Fund Shares Are Priced." Security values may differ depending on the methodology used to determine their values, and may differ from the last quoted sales or closing prices. No assurance can be given that use of these fair value procedures will always better represent the price at which a Fund could sell the affected portfolio security or result in a more accurate net asset value per share of a Fund.

RISKS OF FREQUENT TRADING IN FUND SHARES

Frequent trading of significant portions of the Fund shares may adversely affect Fund performance and therefore, the interests of long-term investors. Volatility in portfolio cashbalances resulting from excessive purchases or sales or exchanges of Fund shares, especially involving large dollar amounts, may disrupt efficient portfolio management and make it difficult to implement long-term investment strategies. In particular, frequent trading of Fund shares may:

- Cause a Fund to keep more assets in money market instruments or other very liquid holdings than it would otherwise like, causing the Fund to miss out on gains in a rising market, or
- Force a Fund to sell some its investments sooner than it would otherwise like in order to honor redemptions, or
- Increase brokerage commissions and other portfolio transaction expenses if securities are constantly being bought and sold by the Fund as assets and move in and out.

To the extent a Fund significantly invests in high yield bonds or small-cap equity securities, because these securities are often infrequently traded, investors may seek to trade Fund shares in an effort to benefit from their understanding of the value of these securities.

PROCEDURES TO LIMIT SHORT-TERM TRADING IN FUND SHARES

The Funds have adopted policies and procedures designed to discourage short-term trading. Although market-timing can take place in many forms, the Funds generally define a market-timing account as an account that habitually redeems or exchanges Fund shares in an effort to profit from short-term movements in the price of securities held by the Funds. The Funds and the Distributor do not accommodate such purchases and redemptions of the shares in the Stock and Bond Funds by Fund shareholders and have taken steps that each deems to be reasonable to discourage such activity. While the Funds make efforts to identify and restrict frequent trading that could impact the management of a Fund, the Funds receive purchase and sales orders through financial intermediaries and cannot always know or detect frequent trading that may be facilitated by the use of intermediaries or by the use of combined or omnibus accounts by those intermediaries.

If a shareholder, in the opinion of the Funds, continues to attempt to use the Funds for market-timing strategies after being notified by the Funds or their agent, the account(s) of that shareholder will be closed to new purchases or exchanges of Fund shares.

Additionally, if any transaction is deemed to have the potential to adversely impact a Fund, the Fund reserves the right to, among other things:

- Reject a purchase or exchange
- Delay payment of immediate cash redemption proceeds for up to 7 calendar days
- Revoke a shareholder's privilege to purchase Fund shares (including exchanges)
- Limit the amount of any exchange

The restrictions above may not apply to shares held in omnibus accounts for which the Funds do not receive sufficient transactional detail to enforce such restrictions.

DISCLOSURE OF PORTFOLIO HOLDINGS

California Investment Trust will make the portfolio holdings of its series (collectively, the "Funds" and each, a "Fund") publicly available within sixty days from the end of each fiscal quarter. Shareholders will receive portfolio holdings information via annual and semi-annual reports, which will be mailed to shareholders and posted on the Funds' web site. Additionally, a schedule of portfolio holdings will be filed with the SEC, which provides public viewing via EDGAR, in accordance with the then current rules governing Form N-Q filings.

Portfolio holdings will be made available by the Trust's Fund Accountant as of the month end, calendar quarter end, and fiscal quarter end by releasing the information to ratings agencies. Shareholders may contact the Funds at (800) 225-8778 for a copy of this report.

A more complete description of the Funds' policies and procedures with respect to the disclosure of the Funds' portfolio securities is available in the Funds' SAI.

OPENING AN ACCOUNT

Class K shares of the Funds may be purchased through the Funds' distributor or through selected brokerage firms and retirement plans. The following information is specific to buying directly from the Funds' distributor. If you invest through a brokerage firm or a retirement plan, different requirements may apply. You should contact them directly for information regarding how to invest or redeem Class K shares through them.

You'll find all the necessary application materials included in the packet accompanying this Prospectus or you may download an investment kit by accessing our website at www.caltrust.com. Additional paperwork may be required for corporations, associations, and certain other fiduciaries. The minimum initial investments and subsequent investments for each fund are as follows:

	Minimum Initial Investment	Minimum Subsequent Investment	IRA Minimum	*IRA Minimum with AIP
Bond Funds	\$1,000	\$250	\$1,000	\$500
Money Market Funds	\$1,000	\$250	\$1,000	\$500
Stock Funds	\$1,000	\$250	\$1,000	\$500

The Fund's distributor, brokerage firm or a retirement plan may change the minimum investment amounts at any time or waive them at its discretion. To protect against fraud, it is the policy of the Funds not to accept unknown third party checks for the purposes of opening new accounts or purchasing additional shares. If you have any questions concerning the application materials, wire transfers, or our yields and net asset values, please call us, toll-free at (800) 225-8778. If you have any questions about our investment policies and objectives, please call us at (415) 398-2727 or (800) 225-8778.

* You may open an IRA account with a minimum initial deposit of \$500 if you participate in our Automatic Investment Plan (AIP). A minimum monthly contribution of \$100 is required through AIP. For additional information on our AIP program, see section titled "Automatic Investment Plan" in this Prospectus.

BUYING AND SELLING SHARES

If you need an account application call us at (800) 225-8778 or download an investment kit from our website at www.caltrust.com. Keep in mind the following important policies:

- A Fund may take up to 7 days to pay redemption proceeds.
- If your shares were recently purchased by check, the Fund will not release your redemption proceeds until payment of the check can be verified which may take up to 15 days.
- Exchange purchases must meet the minimum investment amounts of the Fund you are purchasing.
- You must obtain and read the Prospectus for the Fund you are buying prior to making the exchange.
- If you have not selected the convenient exchange privileges on your original account application, you must provide a medallion signature guaranteed letter of instruction to the Fund, directing any changes in your account.
- The Funds may refuse any purchase or exchange purchase transaction for any reason.

HOW TO BUY SHARES

INITIAL PURCHASE

Make your check payable to the name of the Fund in which you are investing and mail it with the application to the agent of the Funds, ALPS Fund Services, Inc., at the address indicated below. Please note the minimum initial investments previously listed.

CALIFORNIA INVESTMENT TRUST FUND GROUP
C/O ALPS FUND SERVICES, INC.
P.O. BOX 2482
DENVER, CO 80201

You may also forward the account application to the Funds' offices, which will in turn forward the check on your behalf to the Funds' agent. Please note that the shares will be purchased at the next calculated price after receipt by the agent, which is typically the next business day following receipt at the Funds' offices. The Funds' office is located at the following address:

CALIFORNIA INVESTMENT TRUST FUND GROUP
P.O. BOX 387
SAN FRANCISCO, CA 94104-0387

PURCHASING BY EXCHANGE

You may purchase Class K shares in a Fund by exchanging Class K shares from an account in one of our other Funds. Such exchanges must meet the minimum amounts required for initial or subsequent investments. When opening an account by exchanging shares, your new account must be established with the same registration as your other California Investment Trust Fund Group account and an exchange authorization must be in effect. If you have an existing account with us, call (800) 225-8778 during normal business hours (8:00 a.m. to 5:00 p.m., Pacific time) to exchange shares.

You may also exchange shares by accessing our website at www.caltrust.com. You must complete the online access agreement in order to access your account online. Each exchange actually represents the sale of shares of one Fund and the purchase of shares in another, which may produce a gain or loss for tax purposes. We will confirm each exchange transaction with you by mail.

All transactions are processed at the share price next calculated after receiving the instructions in good form (as defined below), normally at 4:00 p.m. Eastern time (1:00 p.m. Pacific time).

WIRE INSTRUCTIONS:

Provide your bank or broker with these instructions

State Street Bank & Trust Co.
ABA # 011000028
For: California Investment Trust Fund Group
Account # 00143305
For further credit to:
Name of Fund: *(name of fund here)*
Account Registration: *(name on account here)*
Account Number: *(account number here)*

In order to make your order effective, we must have your order in good form. “Good form” means that the Fund’s transfer agent has all the information and documentation it deems necessary to effect your order. All purchases are subject to screens as required by applicable federal and state regulations. Please note the Funds and its Manager reserve the right to reject any purchase. Your purchase will be processed at the net asset value next calculated after your order has been received by the Funds’ agent. You will begin to earn dividends as of the first business day following the day of your purchase.

All your purchases must be made in U.S. dollars and checks must be drawn on banks located in the U.S. We reserve the right to limit the number of investment checks processed at one time. If the check does not clear, we will cancel your purchase, and you will be liable for any losses and fees incurred.

When you purchase by check, redemption proceeds will not be sent until we are satisfied that the investment has been collected (confirmation of clearance may take up to 15 days). Payments by check or other negotiable bank deposit will normally be effective within 2 business days for checks drawn on a member of the Federal Reserve System and longer for most other checks. Wiring your money to us will generally reduce the time you must wait before redeeming or exchanging shares. You can wire federal funds from your bank or broker, which may charge you a fee.

You may buy shares of a fund through selected securities brokers. Your broker is responsible for the transmission of your order to ALPS Fund Services, Inc, the Funds’ agent, and may charge you a fee. You will generally receive the share price next determined after your order is placed with your broker, in accordance with your broker’s agreed upon procedures with the Funds. Your broker can advise you of specific details.

If you wish, you may also deliver your investment checks (and application, for new accounts) to the Funds’ office. Your order will be forwarded promptly to the Funds’ agent for processing. You will receive the share price next determined after your check has been received by ALPS Fund Services, Inc. Checks delivered to the Funds’ office will be sent by overnight delivery to the Funds’ agent, so in most cases, the shares will be purchased on the following business day.

The Funds do not consider the U.S. Postal Service or other independent delivery service to be their agents. Therefore, deposit in the mail or with such delivery services does not constitute receipt by ALPS Fund Services, Inc. or the Funds.

PURCHASING ADDITIONAL SHARES

Make your check payable to the name of the Fund in which you are investing, write your account number on the check, and mail your check with your confirmation stub to the address printed on your account statement. There is a \$250 minimum for subsequent investments, unless made through the Automatic Investment Plan (AIP) as detailed below.

After setting up your online account, you may obtain a history of transactions for your account(s) by accessing our website at www.caltrust.com.

AUTOMATIC INVESTMENT PLAN

Using the Funds’ Automatic Investment Plan (AIP), you may arrange to make additional purchases (minimum \$100) automatically by electronic funds transfer (EFT) from your checking or savings account. Your bank must be a member of the Automated Clearing House. You can terminate the program with ten days written notice. There is no fee to participate in this program, however, a service fee of \$25.00 will be deducted from your account for any AIP purchase that does not clear due to insufficient funds, or if prior to notifying the Funds in writing or by telephone to terminate the plan, you close your bank

account or take other action in any manner that prevents withdrawal of the funds from the designated checking or savings account. Investors may obtain more information concerning this program, including the application form, from the Funds.

The share prices of the Funds are subject to fluctuations. Before undertaking any plan for systematic investment, you should keep in mind that such a program does not assure a profit or protect against a loss.

We reserve the right to suspend the offering of shares of any of the Funds for a period of time and to reject any specific purchase order in whole or in part.

HOW FUND SHARES ARE PRICED

The Funds are open for business every day that the New York Stock Exchange (NYSE) is open with the following expected exceptions: Bond and Money Market Funds are closed on Columbus Day (observed) and Veterans Day (observed). The net asset value of each fund is computed by adding all of its portfolio holdings and other assets, deducting its liabilities, and then dividing the result by the number of shares outstanding for that fund. Our fund accounting service provider calculates this value as of market close, normally 4:00 p.m. Eastern time (1:00 p.m. Pacific time), on each day that the markets are open. However, the Funds may, but do not expect to, determine the net asset value on any day the NYSE is closed for trading. Occasionally, the Manager, subject to the supervision of the Funds' Board of Trustees or Pricing Committee, will make a good faith estimate of a security's "fair value" when market quotations are not readily available.

The number of shares your money buys is determined by the share price of the Fund on the day your transaction is processed. Orders that are received in good form by ALPS Fund Services, Inc. are executed at the net asset value next calculated. The Funds' net asset value will not be calculated, nor transactions processed, on certain holidays observed by national banks and/or the NYSE.

The share prices of the Funds (except the Money Market Fund) will vary over time as interest rates and the value of their securities vary. Portfolio securities of the Stock Funds that are listed on a national exchange are valued at the last reported sale price. Futures contracts are valued at their final settlement price as determined by the Chicago Mercantile Exchange. U.S. Treasury Bills are valued at amortized cost, which approximates market value. Portfolio securities of the U.S. Government Bond Funds are valued by an independent pricing service that uses market quotations representing the latest available mean between the bid and ask price, prices provided by market makers or estimates of market value obtained from yield data relating to instruments or securities with similar characteristics. Securities with remaining maturities of 60 days or less are valued using the amortized cost method as reflecting fair value. All other securities are valued at their fair value as determined in good faith by the Board of Trustees using consistently applied procedures established by Board of Trustees. The effect of valuing securities held by the Funds at fair value may be that the price so determined may be different than the price that would be determined if reliable market quotations were available or if another methodology were used.

The share price of the Funds are reported by the Nasdaq Mutual Fund Quotation Service in the mutual funds section of various newspapers after the heading "California Trust."

PERFORMANCE INFORMATION

All performance information published in advertisements, sales literature and communications to investors, including various expressions of current yield, effective yield, tax equivalent yield, total return and distribution rate, is calculated and presented in

accordance with the rules prescribed by the Securities and Exchange Commission. In each case, performance information will be based on past performance and will reflect all recurring charges against fund income. Performance information is based on historical data and does not indicate the future performance of any fund.

HOW TO SELL SHARES

You may redeem all or a portion of your shares on any business day that the Funds are open for business. Your shares will be redeemed at the net asset value next calculated after we have received your redemption request in good form. Remember that we may hold redemption proceeds until we are satisfied that we have collected the funds which were deposited by check. To avoid these possible delays, which could be up to 15 days, you should consider making your investment by wire, following the instructions as described in the section titled “Wire Instructions” in this Prospectus.

BY MAIL

If you have not elected telephone redemption or transfer privileges, you must send a “medallion signature-guaranteed letter of instruction” specifying the name of the Fund, the number of shares to be sold, your name, and your account number to the Funds’ offices. If you have additional questions, please contact us at (800) 225-8778.

The Funds’ Transfer Agent requires that signature(s) be guaranteed by an eligible signature guarantor such as a commercial bank, broker-dealer, credit union, securities exchange or association, clearing agency or savings association. This policy is designed to protect shareholders and their accounts.

BY CHECK

With check writing, our most convenient redemption procedure, your investment will continue to earn income until the check clears your account. You must apply for the check writing feature for your account. You may redeem by check provided that the proper signatures you designated are on the check. The minimum redemption amount by check is \$500. There is no charge for this service and you may write an unlimited number of checks.

You should not attempt to close your account by check, since you cannot be sure of the number of shares and value of your account. You must use the phone, online or mail redemption feature to close your account. The check writing feature is not available for any of our Stock Funds. Please note that a \$25.00 fee will be charged to your account for any returned check.

BY EXCHANGE

You must meet the minimum investment requirement of the Fund into which you are exchanging. You can only exchange between accounts with identical registrations. Same day exchanges are accepted until market close, normally 4:00 p.m. Eastern time (1:00 p.m. Pacific time).

BY WIRE

You must have applied for the wire feature on your account. We will notify you when this feature is active and you may then make wire redemptions by calling us before 4:00 p.m. Eastern time (1:00 p.m., Pacific time). This means your money will be wired to your bank the next business day.

BY ELECTRONIC FUNDS TRANSFER

You must have applied for the EFT withdrawal feature on your account. Typically, money sent by EFT will be sent to your bank within 3 business days after the sales of your securities. There is no fee for this service.

ONLINE

You can sell shares in a regular account by accessing our website at www.caltrust.com. You may not buy or sell shares in a retirement account using our online feature.

BY TELEPHONE

You must have this feature set up in advance on your account. Call the Funds at (800)225-8778. Give the name of the Fund in which you are redeeming shares, the exact name in which your account is registered, your account number, the required identification information and the number of shares or dollar amount that you wish to redeem.

Unless you submit an account application that indicates that you have declined telephone and/or online exchange privileges, you agree, by signing your account application, to authorize and direct the Funds to accept and act upon telephone, online, telex, fax, or telegraph instructions for exchanges involving your account or any other account with the same registration. The Funds employ reasonable procedures in an effort to confirm the authenticity of your instructions, such as requiring a seller to give a special authorization number or password. Provided these procedures are followed, you further agree that neither the Funds nor the Funds' agent will be responsible for any loss, damage, cost or expense arising out of any instructions received for an account.

You should realize that by electing the telephone exchange or the online access options, you may be giving up a measure of security that you might otherwise have if you were to exchange your shares in writing. For reasons involving the security of your account, telephone transactions may be tape recorded.

SYSTEMATIC WITHDRAWAL PLAN

If you own shares of a fund with a value of \$10,000 or more, you may establish a Systematic Withdrawal Plan. You may receive monthly or quarterly payments in amounts of not less than \$100 per payment. Details of this plan may be obtained by calling the Funds at (800) 225-8778.

OTHER REDEMPTION POLICIES

Retirement Plan shareholders should complete a Rollover Distribution Election Form in order to sell shares of the Funds so that the sale is treated properly for tax purposes.

Once your shares are redeemed, we will normally mail you the proceeds on the next business day, but no later than within 7 days. When the markets are closed (or when trading is restricted) for any reason other than its customary weekend or holiday closing, or under any emergency circumstances as determined by the Securities and Exchange Commission to merit such action, we may suspend redemption or postpone payment dates. If you want to keep your account(s) open, please be sure that the value of your account does not fall below \$5,000 (\$1,000 in the case of Stock Funds) because of redemptions. The manager may elect to close an account and mail you the proceeds to the address of record. We will give you 30 days written notice that your account(s) will be closed unless you make an investment to increase your account balance(s) to the \$5,000 minimum (\$1,000 in the case of the Stock Funds). If you close your account, any accrued dividends will be paid as part of your redemption proceeds.

The share prices of the Funds will fluctuate and you may receive more or less than your original investment when you redeem your shares.

THE FUNDS AND THE MANAGER RESERVE CERTAIN RIGHTS, INCLUDING THE FOLLOWING:

- To automatically redeem your shares if your account balance falls below the minimum balance due to the sale of shares.
- To modify or terminate the exchange privilege on 60 days written notice.
- To refuse any purchase or exchange purchase order.
- To change or waive a Fund's minimum investment amount.
- To suspend the right to redeem shares, and delay sending proceeds, during times when trading on the principal markets for the Funds are restricted or halted, or otherwise as permitted by the SEC.
- To withdraw or suspend any part of the offering made by this Prospectus.
- To automatically redeem your shares if you fail to provide all required enrollment information and documentation.

OTHER POLICIES

SHARE MARKETING PLAN (RULE 12B-1 PLAN)

Each Fund has adopted a Rule 12b-1 Plan for its Class K shares. Under the Rule 12b-1 Plan, each Fund will pay distribution fees to the Distributor at an annual rate of 0.25% of each Fund's aggregate average daily net assets attributable to its Class K shares to reimburse the Fund's distributor for its distribution costs with respect to such class. Because the Rule 12b-1 fees are paid out of each Fund's assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges. A portion of the Rule 12b-1 fees may also be used to pay brokers and other financial intermediaries for providing distribution services. Another class of the Funds, without the Rule 12b-1 fees, is available under a separate prospectus and may be purchased directly from the Funds. A prospectus for these shares may be obtained by calling the Funds at (800) 225-8778.

SHAREHOLDER SERVICING PLAN

Each Fund has adopted a Shareholder Servicing Plan, under which the Fund pays CCM Partners or its distributor a shareholder servicing fee at an annual rate of up to 0.25% of the Fund's average daily net assets. The fee is intended to reimburse the recipient for providing or arranging for services to shareholders. The fee may also be used to pay certain brokers, transfer agents and other financial intermediaries for providing shareholder services.

TAX-SAVING RETIREMENT PLANS

We can set up your new account in a fund under one of several tax-sheltered plans. The following plans let you save for your retirement and shelter your investment earnings from current income taxes:

SIMPLE, SEP, 401(k)/Profit-Sharing and Money-Purchase Plans (Keogh): Open to corporations, self-employed people and partnerships, to benefit themselves and their employees.

403(b) Plans. Open to eligible employees of certain states and non-profit organizations. Each IRA is subject to an annual custodial fee of \$10.00 per social security number.

For 2010, the fee will be waived for IRAs with a balance greater than \$10,000. This fee is normally assessed in the Fall of each year.

We can provide you with complete information on any of these plans, including information that discusses benefits, provisions and fees.

CASH DISTRIBUTIONS

Unless you otherwise indicate on the account application, we will reinvest all dividends and capital gains distributions back into your account. You may indicate on the application that you wish to receive either income dividends or capital gains distributions in cash. Electronic Funds Transfer (EFT) is available to those investors who would like their dividends electronically transferred to their bank accounts. For those investors who do not request this feature, dividend checks will be mailed via regular mail.

If you elect to receive distributions by mail and the U.S. Postal Service cannot deliver your checks or if the checks remain uncashed for six months or more, we will void such checks and reinvest your money in your account at the then current net asset value and reinvest your subsequent distributions.

STATEMENTS AND REPORTS

Shareholders of the Funds will receive statements at least quarterly and after every transaction that affects their share balance and/or account registration. A statement with tax information will be mailed to you by January 31 of each year, a copy of which will be filed with the IRS if it reflects any taxable distributions. Twice a year you will receive our financial statements, at least one of which will be audited.

The account statements you receive will show the total number of shares you own and a current market value. You may rely on these statements in lieu of share certificates which are not necessary and are not issued. You should keep your statements to assist in record keeping and tax calculations.

We pay for regular reporting services, but not for special services, such as a request for an historical transcript of an account. You may be required to pay a separate fee for these special services. After setting up your online account, you may also obtain a transaction history for your account(s) by accessing our website at www.caltrust.com.

CONSOLIDATED MAILINGS & HOUSEHOLDING

Consolidated statements offer convenience to investors by summarizing account information and reducing unnecessary mail. We send these statements to all shareholders, unless shareholders specifically request otherwise. These statements include a summary of all funds held by each shareholder as identified by the first line of registration, social security number and zip code. Householding refers to the practice of mailing one prospectus, Annual Report and Semi-Annual Report to each home for all household investors. The Funds will use this practice for all future mailings. If you would like extra copies of these reports, please download a copy from www.caltrust.com or call the Funds at (800) 225-8778.

DIVIDENDS & TAXES

Any investment in the Funds typically involves several tax considerations. The information below is meant as a general summary for U.S. citizens and residents. Because your situation may be different, it is important that you consult your tax advisor about the tax implications of your investment in any of the Funds.

As a shareholder, you are entitled to your share of the dividends your fund earns. The

Stock Funds distribute substantially all their dividends quarterly. Shareholders of record on the second to last business day of the quarter will receive the dividends.

The Bond Funds and the Money Market Fund distribute substantially all their dividends monthly. Shareholders of record on the second to last business day of the month will receive the dividends.

Capital gains are generally paid on the last day of November, to shareholders of record on the second to last business day of November of each year. The Money Market Fund does not expect to pay any capital gains. At the beginning of each year, shareholders are provided with information detailing the tax status of any dividend the Funds have paid during the previous year.

After every distribution, the value of a fund share drops by the amount of the distribution. If you purchase shares of one of the Funds before the record date of a distribution and elect to have distributions paid to you in cash, you will pay the full price for the shares and then receive some portion of that price back in the form of a taxable distribution. This is sometimes referred to as buying a dividend.

REVENUE SHARING

The Manager, out of its own resources, and without additional cost to the Funds or their shareholders, may provide additional cash payments or non-cash compensation to intermediaries who sell shares of the Funds. Such payments and compensation are in addition to service fees paid by the Funds. These additional cash payments are generally made to intermediaries that provide shareholder servicing, marketing support and/or access to sales meetings, sales representatives and management representatives of the intermediary. Cash compensation may also be paid to intermediaries for inclusion of the Funds on sales list, including a preferred or select sales list, in other sales programs or as an expense reimbursement in cases where the intermediary provides shareholder services to Fund shareholders.

IDENTITY VERIFICATION PROCEDURES NOTICE

The USA PATRIOT Act requires financial institutions, including mutual funds, to adopt certain policies and programs to prevent money-laundering activities, including procedures to verify the identity of customers opening new accounts. When completing the account application, you will be required to supply the Funds with information, such as your taxpayer identification number, that will assist the Funds in verifying your identity. Until such verification is made, the Funds may temporarily limit additional share purchases. In addition, the Funds may limit additional share purchases or close an account if it is unable to verify a customer's identity. As required by law, the Funds may employ various procedures, such as comparing the information to fraud databases or requesting additional information or documentation from you, to ensure that the information supplied by you is correct. Your information will be handled by us as discussed in our privacy statement below.

PRIVACY STATEMENT

NOTICE OF PRIVACY POLICY

When you become an investor with California Investment Trust Fund Group, you entrust us not only with your hard-earned assets but also with your non-public personal and financial information (shareholder information). We consider your Shareholder Information to be private and confidential, and we hold ourselves to the highest standards of trust and fiduciary duty in their safekeeping and use.

OUR PRIVACY PRINCIPLES:

- We do not sell shareholder information.
- We do not provide shareholder information to persons or organizations outside the California Investment Trust Fund Group who are doing business on our behalf (e.g., non-affiliated third parties), for their own marketing purposes.
- We afford prospective and former shareholders the same protections as existing shareholders with respect to the use of shareholder information.

INFORMATION WE MAY COLLECT:

We collect and use information we believe is necessary to administer our business, to advise you about our products and services, and to provide you with customer service. We may collect and maintain several types of Shareholder Information needed for these purposes, such as those below:

- *From you*, (application and enrollment forms, transfer forms, distribution forms, checks, correspondence, or conversation), such as your address, telephone number, and social security number.
- *From your transactions with our transfer agent*, such as your transaction history, and account balance.
- *From electronic sources*, such as our website or e-mails.

HOW WE USE INFORMATION ABOUT YOU:

The California Investment Trust Fund Group will only use information about you and your California Investment Trust accounts to help us better serve your investment needs or to suggest California Investment Trust Fund Group services or educational materials that may be of interest to you.

INFORMATION DISCLOSURE:

We do not disclose any non-public personal information about our shareholders or former shareholders to non-affiliated third parties without the shareholder's authorization. However, we may disclose shareholder information to persons or organizations inside or outside our family of funds, as permitted or required bylaw. For example, we will provide the information, as described above, to our transfer agent to process your requests or authorized transactions.

HOW WE PROTECT YOUR INFORMATION:

We restrict access to your shareholder information to authorized persons who have a need for these records in order to provide products or services to you. We also maintain physical, electronic, and procedural safeguards to guard shareholder information. To further protect your privacy, our website uses the highest levels of internet security, including data encryption, Secure Sockets Layer protocol, user names and passwords, and other tools. As an added measure, we do not include personal or account information in non-secure e-mails that we send you via the Internet.

For shareholders with Internet access, California Investment Trust Fund Group recommends that you do not provide your user name or password for any reason to anyone.

In the event that you hold shares of one or more funds through a financial intermediary, including, but not limited to, a broker-dealer, bank, or trust company, the privacy policy of that financial intermediary would govern how your nonpublic personal information would be shared with non-affiliated third parties.

TO LEARN MORE

This Prospectus contains important information on the Funds and should be read and kept for future reference. You can also get more information from the following sources:

ANNUAL AND SEMI-ANNUAL REPORTS

These are automatically mailed to all shareholders without charge. In the Annual Report, you will find a discussion of market conditions and investment strategies that significantly affected each fund's performance during its most recent fiscal year. The Annual Report is incorporated by reference into this Prospectus, making it a legal part of the Prospectus.

STATEMENT OF ADDITIONAL INFORMATION

This includes more details about the Funds, including a detailed discussion of the risks associated with the various investments. The SAI is incorporated by reference into this Prospectus, making it a legal part of the Prospectus.

You may obtain a copy of these documents free of charge by calling the Funds at (800) 225-8778, by accessing the Funds' website at www.caltrust.com, or by emailing the Funds at info@caltrust.com, or by contacting the SEC at the address noted below or via e-mail at publicinfo@sec.gov. The SEC may charge you a duplication fee. You can also review these documents in person at the SEC's Public Reference Room, or by visiting the SEC's Internet Site at www.sec.gov.
